

INDICATIONS: For use in healthy ewes as an aid in the control of Ovine Genital Campylobacteriosis (vibriosis) caused by *Campylobacter fetus* and *Campylobacter jejuni*.

Vaccine is an aqueous suspension of inactivated cultures of *Campylobacter fetus* and *Campylobacter jejuni* containing aluminum hydroxide as an adjuvant.

Contains thimerosal as a preservative.

DIRECTIONS: Store at 2° to 7° C. Do not freeze. Shake well before use. Use entire contents when first opened. Do not vaccinate within 21 days before slaughter.

PRECAUTIONS: Anaphylactoid reaction may occur following administration of products of this nature. If noted, administer adrenalin or equivalent.

DOSAGE AND ADMINISTRATION: Inject 5ml subcutaneously in the fold of the skin behind the axillary space shortly before breeding. Repeat in 60-90 days.

Revaccinate annually using a single dose.
